

**Department of Physical Pharmacy and Pharmacokinetics
Poznan University of Medical Sciences**

**Regulations for the course *Mathematics in Dentistry*
for the 1st Year DDS Program Students
Academic year 2021/2022**

1. The didactic goals depicted in the syllabus (available in the AKSON system at wisus.ump.edu.pl) are realized during seminars conducted in a stationary form.
2. Seminars are obligatory. The attendance to the seminars is controlled.
3. Students are obliged to come to the classroom on time. Two cases of being late more than 15 min are treated as one absence.
4. During classes, students are obliged to wear a mask on the nose and mouth.
5. Students are expected to actively participate in the seminars. Also, they are obliged to do their homework exercises in order to be prepared for the final test.
6. A maximum of two absences from the seminars are allowed. In case of non-attendance, students are obliged to make up the subject matter of the missed class.
7. To receive credits, students have to pass a final test in the form of open calculations. The test is conducted in a stationary (traditional) form. The score of at least 60% is required to pass the test. **The attendance to a minimum of 12 out of 14 prior seminars is a prerequisite for taking the final test.**
8. Three attempts are offered to pass the test, including 1st and 2nd retakes. The dates of the tests are established within 1 week following the beginning of the seminars after prior consultation with the class representative.
9. A non-attendance to the final test must be explained by presenting a formal excuse document not later than 7 working days after the date of the test. The unexcused absence or unaccepted excuse results in losing a given test attempt and in receiving an unsatisfactory grade. If the explanation of absence is accepted, the date of an extra attempt is established.
10. If a stationary form of the classes is precluded by epidemiological restrictions, the classes will be realized remotely.

Prof. dr. hab. Franciszek Główka
Head of the Department
of Physical Pharmacy and Pharmacokinetics

Dr. hab. Michał Romański
Course coordinator
